- Time Management
- Effective Communication
- Critical Thinking
- Creative problem solving
- Analytical and structured
- Empathetic and user-centered
- Lifelong learner
- Resourceful and self-motivated

LANGUAGES

- Swedish (Native)
- English (Fluent)
- Italian (Intermediate)

PROFILE

Hi, I am a creative and solution-oriented frontend developer with a passion for building smart, user-friendly web applications. With a background in design and a year of hands-on coding experience through the SheCodes Bootcamp, I combine technical skills with a strong eye for detail and usability.

I love solving real-world problems with clean code, thoughtful design, and intuitive functionality. Whether I'm working with React, Bootstrap, or integrating API's, my goal is always the same: to simplify and improve everyday experiences.

I am fluent in both Swedish and English, comfortable with tools like VS Code, GitHub, and Figma, and I thrive in projects where I get to learn, grow, and create something meaningful.

TECHNICAL SKILLS & EXPERIENCE

- **SheCodes Bootcamp** 2024 - 2025
 - Fundamentals and Advanced Frontend Development: HTML, CSS, JavaScript, responsive design, and Bootstrap
 - In-Depth React Training: Including hooks, state management, and component-based architecture
 - Application Projects: Built real-life apps using API's, dynamic JSON data handling and live data integration.
 - Version Control: GIT + GitHub - collaboration, code reviews, and publishing workflows
 - Python and AI Integration: Basics of Python, data visualization, and implementing AI features in web apps
 - UI/UX & Hosting: Design principles using Figma, SEO best practices and building complete websites
 - Workflow and Methodology: Agile work methods with daily deadlines, peer reviews, and live demo sessions
 - Portfolio: Completed several projects during the bootcamp, including responsive websites, React apps, and AI-powered tools
